

Save Beach Access: Thornton State Beach

Join the growing group of concerned residents, business owners, dog owners, horse lovers and outdoor enthusiasts banding together to save public access to Thornton State Beach in Daly City, CA.

This fence precludes safe access to the trail on parcel APN 002-011-060 and negatively impacts outdoor use by the public including dog walking, hiking, horseback riding, fishing, para sailing and gliding, surfing, outdoor education about nature and more. Daly City Fire and local Daly City police services are also restricted in vehicular access to the beach to handle emergencies. The Marine Mammal Center and other non-profits conducting nature-based education and environmental native plant restoration are now similarly compromised.

Please help us preserve access to open space in Daly City.
